AFTERGLOW

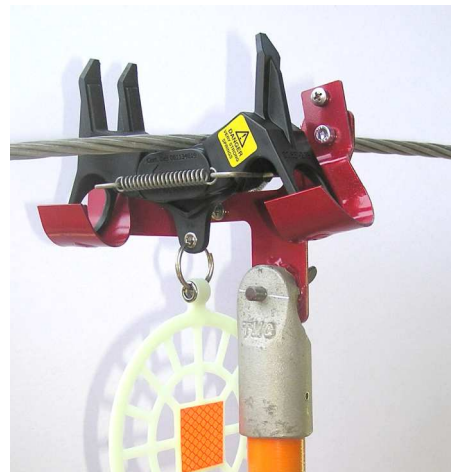

Emits ultra violet light which birds see brightly

REDUCE OUTAGES ON OVERHEAD LINES DUE TO BIRD STRIKE

- * Protects birds from flying to conductors by making the wires visible.
- * Birds notice the UV emitting roundel and focus on it and then see the wires then the conductor and veer away.
- * The afterglow can be fitted from the ground with a hotstick and simple tool.
- * The reflective patch glints in the sun or moon light.
- * The AG glows in the dark at dusk and dawn when birds fly
- * Can be attached to any size conductor or ABC or steel angles.

Glowing at night

Fitting to overhead wires
with application tool

The bird flight diverter is made from long lasting UV resistant materials with stainless steel rings & clips. The strongly sprung 3 finger clamp has been proven in use world wide for 20 years and will attach to hi voltage power conductors, ABC, earth wires, stays and guys, steel angle, pipes etc.

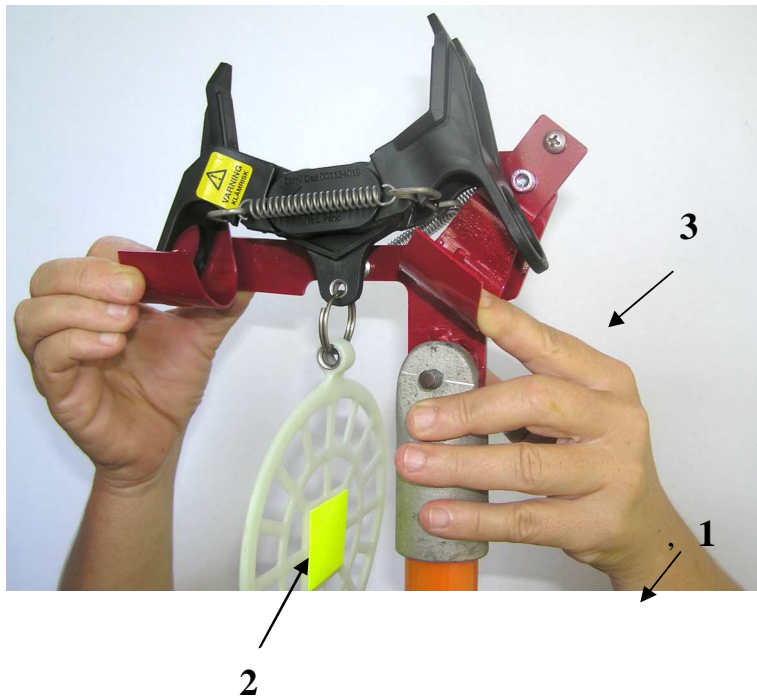

APPLICATION & REMOVAL of the Afterglow & the Firefly with red application tool 1024 .

FIRST

PULL THE ON THE RINGS
UNTIL THE CLAMP
STAYS OPEN

SECOND

PULL THE LEVER DOWN, 1 .
POSITION THE SNAP CLAMP WEB
BETWEEN THE TOOL SIDES 2 .
THEN ROCK THE CLAMP TO THE LEFT
UNTIL THE FINGER
RING GOES OVER THE PEG IN THE CUP AT
THE TOP 3

THIRD

POSITION THE CLAMP UP
UNDERNEATH THE CONDUCTOR
AND PUSH UP QUICKLY
CAUSING IT TO SNAP SHUT

TO REMOVE
PUT HOOK THRU ONE OF THE FINGER
RINGS ON SNAP CLAMP AND PULL
DOWN UNTIL IT OPENS THEN LIFT UP TO IT SLIDES
ONTO THE HOOK TOOL OR FALLS TO THE GROUND
